PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in networking protocols, operating system fundamentals, web architecture, and secure application development. Cisco Networking Academy certified in fundamental routing, switching, and OS security principles. Adept at building full-stack web applications with robust server-side security, JWT authentication, and Role-Based Access Control (RBAC). Passionate about cybersecurity domains including SOC, VAPT, and Digital Forensics, with hands-on technical problem-solving capabilities.

EDUCATION

Bachelor of Technology in Computer Science & Engineering Expected Graduation: 2029
GL Bajaj Institute of Technology and Management, Greater Noida

Higher Secondary Education (12th Standard, PCM) 2025
APS DK (CBSE) | **Percentage:** 91.8%

TECHNICAL & CYBERSECURITY SKILLS

Networking & Protocols:	TCP/IP Model, OSI Layers, Routing & Switching, HTTP/HTTPS, DNS, Subnetting, Network Packet Analysis Concepts
Operating Systems & CLI:	Linux (CLI, Permission Management, Bash Shell scripting), Windows OS Internals, Process & Memory Management
Web Security & Auth:	JWT Authentication, Role-Based Access Control (RBAC), Password Hashing (bcrypt), Input Sanitization, OWASP Top 10 Awareness
Programming & Scripting:	Java, C, JavaScript (ES6+), Python (Basics), SQL, Bash
Web & Backend Technologies:	Node.js, Express.js, React.js, RESTful APIs, MongoDB, MySQL, Git, GitHub, VS Code
Domains of Interest:	Security Operations Center (SOC), Vulnerability Assessment & Penetration Testing (VAPT), Red Teaming, Digital Forensics

PROJECTS & TECHNICAL WORK

Full-Stack Airbnb Web Application | *MERN Stack, JWT, RBAC, Password Hashing* 2026 (Present)

- Developing a full-stack property rental platform implementing robust user session management and property listing workflows.
- Engineering backend RESTful APIs using Node.js and Express with proper MVC-style architecture for scalable data flow and request handling.
- Implementing secure user authentication and Role-Based Access Control (RBAC) using JWT to safeguard host and guest privilege boundaries.
- Structuring dynamic MongoDB database models to manage user profiles, property listings, booking reservations, and access logs securely.

Social Media Application | *React.js, JavaScript, HTML5, CSS3* 2026

- Engineered a dynamic single-page web app with React.js, utilizing state management to safely handle user input feeds and client-side interactions.
- Implementing modular component structures to maintain security best practices during data rendering and prevent UI-level vulnerabilities.

Spotify-inspired Web Interface | *HTML5, CSS3, JavaScript* 2026

- Developing an interactive music streaming interface featuring structured UI layouts, navigation controls, and responsive custom playback elements.

CERTIFICATIONS & ACHIEVEMENTS

- **Cisco Networking Academy Certifications:** Completed training covering fundamental networking protocols, TCP/IP, routing, switching, and OS security concepts.
- **100-Day LeetCode Badge:** Solved 100+ algorithmic challenges in Java on LeetCode focused on problem-solving, memory efficiency, and logic building.
- **Competitive Programming:** Active practitioner on LeetCode (@code_obsessed) and GeeksforGeeks honing algorithmic and logic-building skills.

AREAS OF INTEREST & SOFT SKILLS

Soft Skills: Technical Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Strong Communication
Interests: Network Defense • Ethical Hacking & VAPT • SOC Monitoring • Web Application Security • AI in Cybersecurity
